

Today all jobsites, office locations and departments will observe an interruption in work to provide the opportunity for us to make sure that everyone understands, and follows, all relevant safety guidelines provided by public health and safety officials. This Safety Stand Down should happen at or around **1PM**. A virtual “Teams” stand down will be sent to everyone as well.

We are joining all members of the construction industry, across the nation, as we all recognize this national safety stand down today, Thursday, April 9, 2020.

Project and team leaders, please use the talking points below to lead a discussion with your team today. Please continue to observe CDC guidelines of physical groups less than 10 individuals with 6’ of distance between you.
